10,000 Hudson Light Sixes 10 Million Miles of Road

The test of the road is the only true test. Only a few motor-car buyers can afford to experiment with novelties. The average man shows his wisdom by choosing a car that already has "made good." The Hudson Light Six-40 is now in use in the hands of ten thousand private owners. At a low average of 1,000 miles per car it has covered over 10 million miles of average roads. This test is worth more to you than an engineer's hope or a designer's dream. It proves the Hudson to be an attained success—not an experiment.

The Hudson sets the standard. You must see it before you decide. Come, let us show you the car and take you for a drive. You be the judge.
